

REMARKS

The Examiner has stated in his action that the drawings are objected to as generally failing the requirements of 37 CFR 1.84. Applicant has carefully reviewed Examiner's objection and encloses formal drawings for Figures 1 to 10 submitted herewith. The total number of pages containing the drawings is 22.

The Examiner has stated in the office action that the abstract is too long. Applicant therefore has amended the Abstract as provided herewith. Full reconsideration is appreciated.

The disclosure has been objected to because of various informalities such as repeated use of reference numeral "23". Applicant has carefully reviewed the Examiner's objection and has amended the disclosure where appropriate.

The Examiner has stated in his action that the claims must be limited to one invention only and identifies Group I and Group II as allegedly being different inventions. Applicant elects Group I for the invention defined in claims 1 to 5 only. Divisional applications may be filed in due course for the subject matter of non-elected Group II.

Applicant has very carefully considered all of the issues addressed by the Examiner. Applicant elects to prosecute Group I, claims 1-5 in this application. Claim 6 is cancelled without prejudice to filing divisional application in due course.

Applicant therefore has addressed all of the Examiner's concerns and full reconsideration is requested.

Should any questions arise, the Examiner is requested to contact Neil H. Hughes at the office of Applicant's Agents, IVOR M. HUGHES, Barrister & Solicitor, Patent & Trademark Agents at area code (905) 771-6414, at his convenience.

Respectfully submitted,

Neil H. Hughes, P.Eng.
